

## REGIONAL WATER CONSERVATION REBATE PROGRAM REBATE APPLICATION

Twain Harte Community Services District is partnering with the Tuolumne County Resource Conservation District to offer a Water Conservation Rebate Program to all Twain Harte CSD customers for WaterSense toilets and showerheads purchased after January 1, 2017. This program is made possible by grant funding and is anticipated to be available through November 30, 2018.

### Toilet and Showerhead Rebate Information

- Customers may receive a \$100 rebate for one low-flow WaterSense toilet.
- Each resident may receive a \$25 rebate for one WaterSense showerhead.
- Only one application is allowed per household.
- ***The toilet or showerhead must be a WaterSense product.***
- Applicants must complete the information below and attach all receipts to the application in order to receive a rebate. Receipts must be dated January 1, 2017 or later.
- Completed applications and receipts may be submitted to the District in person at the District office, by mail (P.O. Box 649, Twain Harte, CA 95383) or by email (info@twainhartecsd.com).
- Once the applications are approved, a check will be mailed from the District to the address listed on the form within 60 days.

### Toilet / Showerhead Information

Fixture	Model Number	Reimbursement Available	Watersense label (Yes or No)	Date on Receipt
Toilet		\$100.00		
Showerhead		\$25.00		
<b>Total for Reimbursement</b>				

**How Much Water Does a Low-Flow Toilet Save?  
(Answer: On the Other Side)**

## LOW FLOW TOILETS

The toilet is the single biggest water user in your home. Flushing accounts for about one-third of the water used within your home each day.

Replacing an old model toilet with a new low-consumption toilet could automatically and permanently cut your home water consumption by 25% or more. Saving water will help you save money!

## LOOK FOR THE WATERSENSE® LABEL

Unlike some first-generation, "low-flow" toilets, **WaterSense**® labeled toilets combine high efficiency with high performance. Design advances enable WaterSense labeled toilets to save water with no trade-off in flushing power. Whether remodeling a bathroom, or simply replacing an old, leaky toilet that is wasting money and water, installing a WaterSense® labeled toilet is a high-performance, water-efficient option worth considering. If every American home with older, inefficient toilets replaced them with new WaterSense labeled toilets, we would save nearly 640 billion gallons of water per year, equal to more than two weeks of flow over Niagara Falls!

For more information or a list of WaterSense labeled products, visit [www.epa.gov/watersense](http://www.epa.gov/watersense).
