

SUPPLEMENTAL QUESTIONNAIRE

Fire Apparatus Engineer

Candidates must submit written answers to each of the following questions with their job application package.

1. Why do you want to be a Fire Engineer with the Twain Harte Fire Department?
2. Please describe some actions you have taken (beyond what was required) to improve yourself in the fire service. Include specific examples and the year you took those actions.
3. Customer service and community involvement are a priority for Twain Harte Fire Department. If you live in the County, please describe how you have been involved in the community. If you do not live in the County, explain what you would do to become part of the community.
4. Describe a stressful incident you have responded to in your fire career. What made the situation stressful? How did you respond? How did you work with others to address the situation?
5. One of the collateral duties of the Fire Engineer position will be assisting with the Department's training program and providing hands-on instruction to firefighters and interns. Describe your experience conducting fire service training, including specific examples of training topics you have instructed, the personnel you have trained, and how you ensure that training is conducted safely and effectively
